DATA ENGINEER

Results-driven Data Engineer with 8+ years of experience architecting scalable data solutions across AWS, Azure, and Snowflake. Specialized in modern orchestration (Airflow, dbt) and cloud data warehouse optimization, with hands-on experience leading SQL Server-to-Snowflake migrations and cost/performance tuning at enterprise scale. Strong background in data modeling, API integration, and CI/CD-driven delivery. Proven track record translating complex business requirements into production-grade analytics platforms across SaaS and Fortune 500 enterprise environments.

KEY TECHNICAL SKILLS

- **Databases & Querying:** Microsoft SQL Server (advanced optimization, stored procedures, indexing, performance tuning), PostgreSQL, Oracle
- **Cloud & Big Data Platforms:** AWS (Glue, S3, Redshift, EMR), Snowflake (pipelines, cost/performance optimization), Databricks (PySpark, Scala, Delta Lake)
- **ETL & Data Integration:** Apache Airflow, AWS Glue, Python ETL pipelines, data migration (on-prem to cloud), Informatica
- **Programming & Scripting:** Python (pandas, automation, ML models), Scala, Shell scripting (Linux/Unix)
- **Data Modeling & Warehousing:** Star/Snowflake schema design, Slowly Changing Dimensions (SCD), data lakehouse architectures
- **Visualization & BI:** Power BI (dashboards, DAX, data modeling), Tableau, Excel (advanced formulas, automation)
- **Other Tools & Practices:** Git/GitHub, CI/CD pipelines, Agile/Scrum, FinOps for Snowflake/AWS cost control

PROFESSIONAL EXPERIENCE

Current Clients: IANS Research + Veho Tech

Apr 2025 - Current

Technical Lead & Senior Technology Consultant

Collaborated with enterprise clients, including AB InBev, Boston Scientific, IANS Research, Veho and Allata, to design and implement scalable data engineering and cloud solutions, leveraging Python, SQL Server, SSIS, AWS, and enterprise ETL tools such as Informatica to build and maintain robust ingestion and transformation pipelines. Optimized data models and warehouse structures to support efficient, low-latency analytics, while ensuring reliability, scalability, and fault tolerance of production workflows. Partnered with cross-functional stakeholders to translate business requirements into data solutions, proactively monitoring pipelines, resolving performance issues, and maintaining high system availability. Implemented CI/CD practices with Git and Azure DevOps to automate testing and deployment, while enforcing data quality, governance, and leveraging AI-assisted tools to improve development efficiency.

Technologies used: AWS (Lambda, S3, Glue, CloudWatch), Python, SQL, Git, CI/CD, Airflow, Informatica

Accomplishments:

- Led the architecture and delivery of end-to-end technology solutions for enterprise clients, defining scalable cloud, data, and application frameworks that accelerated project execution and reduced long-term maintenance overhead.
- Directed cross-functional engineering teams in building distributed systems, modernizing legacy platforms, and implementing robust CI/CD and DevOps practices, resulting in improved reliability and deployment velocity.

CONTRACT & CONSULTING ENGAGEMENTS

Pariveda Solutions Inc.

Sept 2024 - Apr 2025

Consultant (C2)

Collaborated with clients across diverse industries to architect and implement technology solutions that drive business value. Led initiatives in software development, data engineering, and cloud infrastructure, ensuring scalable and maintainable outcomes. Partnered with stakeholders to translate complex business requirements into actionable technical designs, fostering innovation and operational excellence. Championed agile methodologies and continuous improvement, delivering high-impact results aligned with client objectives.

Technologies used: AWS (Lambda, S3, Glue, CloudWatch), Python, SQL, Git, CI/CD, Airflow

Accomplishments:

- Developed and deployed full-stack web applications using React, Python, and AWS services, streamlining internal workflows and enhancing user experience for client stakeholders.
- Engineered scalable data pipelines leveraging Snowflake and dbt, improving data transformation processes and ensuring reliable data delivery for analytics initiatives.
- Optimized cloud infrastructure on AWS, enhancing system performance and reducing operational costs through effective use of AWS S3 Buckets and serverless services.
- Collaborated with cross-functional teams to design and implement API integrations using Postman and Python, enabling seamless data exchange between client systems and third-party platforms.
- Championed Agile best practices within project teams, contributing to efficient sprint planning, continuous delivery, and improved client satisfaction through regular feedback cycles.

Verizon Communications Inc.

Dec 2023 - Sept 2024

Data Engineer

Utilized expertise in data architecture and engineering to design, develop, and maintain scalable data pipelines. Ensured data integrity and availability, enhancing analytics and business intelligence capabilities. Collaborated with cross-functional teams and stakeholders to deliver robust data solutions, supporting strategic decision-making and operational efficiency.

Technologies used: Python, Spark, AWS EMR, Microsoft SQL Server, SSIS, dbt, SQL, Git, REST APIs

Accomplishments:

- Implemented comprehensive data validation and cleansing processes, significantly reducing data discrepancies and ensuring the accuracy and reliability of business intelligence reports.
- Designed and optimized data pipelines to improve processing speed and efficiency, reducing data latency by 40% and enabling faster access to critical business insights.

CoreCard Software Inc.

Mar 2023 - Oct 2023

Senior Production Support Engineer

Brought expertise in troubleshooting and resolving complex technical issues, minimizing downtime, and optimizing system performance. Collaboration with cross-functional teams and stakeholders to deliver high-quality solutions and meet production goals.

Technologies used: Jenkins, Kafka, Matillion, Python, Microsoft SQL Server, SSIS, SQL Server, Azure, Docker

Accomplishments:

- Successfully investigated and resolved production/test issues reported by chat and emails, ensuring minimal disruption to operations and maintaining high client satisfaction.
- Provided efficient data and code fixes based on the nature and severity of the issues, resulting in improved system stability and performance.

Data Engineer

Delivered data engineering and software development solutions for clients across healthcare, banking, and security industries, leading nation-wide operational initiatives and full-stack web application projects from architecture through deployment.

Technologies used: Python, Matillion, ETL, Microsoft SQL Server, SSIS, Agile, .Git, SQL, Jenkins, Azure

Accomplishments:

- Led nation-wide operations for a multi-year engagement, driving 120% growth over two years through streamlined processes and improved coordination between development and operations teams
- Led migration of on-premises infrastructure to the cloud, optimizing resource utilization and scalability
- Implemented CI/CD pipelines, reducing deployment time by 50% and improving release reliability
- Delivered a complex web application project for a prominent client, meeting all milestones ahead of schedule
- Implemented an automated testing framework, reducing testing time by 40% and improving software quality

EDUCATION

Saint Leo University

Bachelor of Systems Engineering

Codecademy

- Learn SQL Course
- Learn Python 3 Course
- Getting Started Off-Platform for Data Science Course

Coursera

- **Google Data Analytics Professional Certificate**
 - Foundations: Data, Data, Everywhere
 - Ask Questions to Make Data-Driven Decisions
 - Prepare Data for Exploration
 - Process Data from Dirty to Clean
 - Analyze Data to Answer Questions
 - Share Data Through the Art of Visualization
 - Data Analysis with R Programming
 - Google Data Analytics Capstone: Complete a Case Study
- **Google Project Management Professional Certificate**
 - Foundations of Project Management
 - Project Initiation: Starting a Successful Project
 - Project Planning: Putting It All Together
 - Project Execution: Running the Project
 - Agile Project Management
 - Capstone: Applying Project Management in the Real World

EDUCATION (CONTINUATION)

Coursera

- **DevOps on AWS Specialization**
 - AWS Cloud Technical Essentials
 - DevOps on AWS: Code, Build, and Test
 - DevOps on AWS: Release and Deploy
 - DevOps on AWS: Operate and Monitor
- **Machine Learning: Algorithms in the Real World Specialization**
 - Introduction to Applied Machine Learning
 - Machine Learning Algorithms: Supervised Learning Tip to Tail
 - Data for Machine Learning
 - Optimizing Machine Learning Performance

Platzi

- **Databases from Scratch Learning Path**
 - Fundamentals of Software Engineering
 - Introduction to Terminal and Command Line Course
 - Database Fundamentals Course
 - Database Course with MySQL and MariaDB
 - PostgreSQL Course
 - SQL Server Database Optimization Course
 - Introduction to Elasticsearch Course
 - Practical SQL Course
 - Introduction to the Cloud with Azure Course
 - Azure Storage Course
 - SQL in Azure Course
 - Azure Database Course
 - Introduction to Google Cloud Platform Course
 - Cloud Storage Course with Google Cloud Platform
 - Firebase 5 for Web Course
 - AWS Cloud Hands-On Course
 - Practical Course on Databases in AWS
 - Business Analysis for Data Science Course
 - PostgreSQL Course Applied to Data Science
 - Spark Fundamentals for Big Data Course
 - AWS Redshift Course for Big Data Handling
